

Physician Health IT Satisfaction Survey

Physician burnout has reached epidemic levels. At Geneia, we believe there is more that all of us in healthcare need to do to improve physician satisfaction.

As a health IT company, Geneia is committed to involving physicians in the design and implementation of our products and to measuring satisfaction among our physician clients at regular intervals.

We invite all health IT companies to join us in monitoring and addressing physician satisfaction and to use this nine-question physician survey.

To learn more about restoring the Joy of Medicine to practicing physicians, visit: <http://marketing.geneia.com/2018/joy-of-medicine/>

1. **Are you**

- Female
- Male

2. **On average, how many hours do you work each week?**

- 30-40
- 41-50
- 51-60
- More than 60

3. **For each of the following aspects of your job indicate your personal level of satisfaction by circling the appropriate number between 1 (very dissatisfied) and 5 (very satisfied).**

	Very Dissatisfied 1	Somewhat Dissatisfied 2	Neutral 3	Somewhat Satisfied 4	Very Satisfied 5
Compensation					
The work itself					
Control over your workday					
Work-life balance					
Autonomy in providing patient care					

4. **In the last 10 years, has the amount of quality time that doctors are able to spend with patients**

- Increased
- Decreased
- Stayed the same

5. **When it comes to some of the challenges of practicing medicine, indicate how strongly you agree or disagree with each of the following statements.**

	Strongly Disagree 1	Somewhat Disagree 2	Neutral 3	Somewhat Agree 4	Strongly Agree 5
I frequently feel rushed when seeing patients.					
It happens more and more often that I talk about my work in a negative way.					
Implementation of practice standards has diminished my autonomy and ability to choose the right treatments for my patients.					
It's often difficult to manage the amount of work required of me.					
The "business and regulation of healthcare" has changed the practice of medicine for the worse.					
The heightened demand for data reporting to support quality metrics and the business side of healthcare has diminished my joy in practicing medicine.					

6. **Do you know a physician who is likely to stop practicing medicine in the next five years, as a result of physician burnout? (Check one.)**

Yes
No
Not sure

7. **Has the introduction of advanced data and analytics tools, population health software, and data registries been a positive or negative development for practicing physicians? (Check one.)**

Positive
Negative
A little of both

8. There are different ways that data and analytics tools help doctors. Thinking about the data and analytics tools used by physicians, indicate your impression of the impact they have by giving each way a rating between 1 (negative impact) and 10 (positive impact).

The data and analytics tools used by physicians have a [1-10 RATING] impact on...

		Rating 1-10	Not Sure
a	Improving my ability to efficiently assess patient history and needs		
b	Helping me get value and improved outcomes from chart documentation		
c	Helping me identify and triage my highest need patients		
d	Creating greater efficiencies in office workflow		
e	Enabling my care team to prep me for each patient, leaving more time for patient engagement		
f	Making room for more quality patient time		
g	Providing me with information needed to help improve quality performance, Medicare Star ratings and HEDIS® reporting (<i>Healthcare Effectiveness Data and Information Set</i>).		

9. If you could use data and analytic tools to improve your job in two of the following ways, which **two** would you choose? (Check two boxes.)

- Less time spent recordkeeping
- More time with every patient in my care
- More time with the patients who require enhanced care
- Easier identification of high-risk patients who need screenings or care management
- Earlier identification of rising-risk patients
- Easier and more reliable stratification of patients into low, rising and high risk
- Better access to patients' complete medical profile/history
- Capabilities that allow other members of the care team besides the physician to

#joyofmedicine
